

RUBBEXX SHEETFED

PRINTING BLANKET

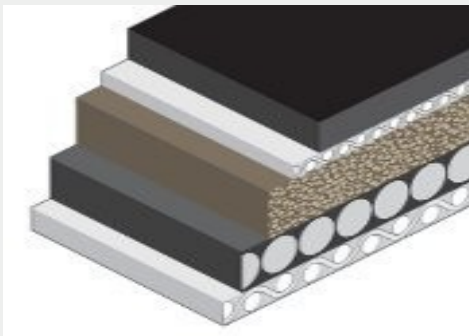

FOR UV COLORS

UV BLACK

FABRIC BASED SHEETFED PRINTING BLANKET

High-quality special printing blanket for sheet-fed offset printing with UV colours:

- // Also resistant to frequent change of substrate and format
- // Very strong compressible layer
- // Minimal setting behaviour across the entire lifespan
- // Excellent crumple resistance
- // Environmentally friendly through solvent-reduced manufacture
- // High swell resistance to UV colours and UV detergents, thanks to a special top cover rubber
- // Only suitable for pure UV printing

TECHNICAL DATA

Printing surface

Color: black
Surface hardness(DIN 53505):
70° Shore A

Compressability

At 1.350 KPa:
0,187 mm ± 0,027 mm

Fabric Layers

3 precision calendered fabric
plies

Nominal thickness (ISO 12636)

1,95 mm
