SHEETFED PRINTING BLANKET

FOR HYBRID COLORS, HIGHCOMPRESSIBLE

CONTI-AIR® EBONY HC

FABRIC BASED SHEETFED PRINTING BLANKET

Tough and highly compressible printing blanket with fineground surface for unsurpassed service life:

- // High durability, even when substrates or sheet sizes are frequently changed
- // Very strong compressible layer
- // Minimal sinking throughout the life of the printing blanket
- // Excellent smash resistance
- // Climate-neutral blanket (PURE PRINTING) because of dissolvent reduced production

TECHNICAL DATA

Printing surface

Color: black
Surface hardness (DIN 53505):
55° Shore A

Compressibility

At 1.350 KPa:
0,227 mm ± 0,027 mm

Fabric Layers

2 precision calendered fabric
plies

Nominal thickness (ISO 12636)

1,95 mm
